Study on Placenta and Pregnancy Screening

Message from the Guest Editor

One of the most important tasks of modern perinatology is to diagnose and prevent prenatal and postnatal complications in high-risk pregnancies soon. In pregnancies at risk, abnormal placental circulation is one of the main problems, which can lead to endogenous stress. This results in redistribution of the fetal circulation, which also affects the arterial circulation of the fetal kidney, causing prolonged hypoxaemia, hypovolaemia, hypotension, metabolic acidosis, leading to subsequent renal failure, and impaired renal perfusion. Research on placental and fetal organ vascularisation and volumetric changes in vivo/in vitro has become a major area of research in the work groups through the development of various diagnostic techniques. Conventional two-dimensional ultrasound and MRI are widely used to monitor the placenta during pregnancy. In prenatal diagnosis, examination of the fetus is of paramount importance, but it should be remembered that emphasis should also be placed on examination of the placenta itself, another member of the fetoplacental unit. In this Special Issue, we look forward to the results of research on these topics from all countries of the world.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
