

Special Issue

Infection and Pathogenesis Research

Message from the Guest Editors

Infectious diseases in livestock are a major threat to global animal health and welfare, and their effective control is crucial for agronomic health, as well as for safeguarding and securing national and international food supplies. How to efficiently combat infectious agents, including bacteria, viruses and parasites, is now more important than ever. Understanding the mechanisms of pathogenesis caused by bacteria, viruses and parasites plays a key role in preventing infectious diseases in animals. This Special Issue aims to present the latest findings regarding the host–pathogen interaction, and will cover all topics concerning the pathogenesis, virulence and control strategies of animal epidemic disease.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
