

## Special Issue

# Novel Insights into Coronary Artery Disease

### Message from the Guest Editors

Diabetes mellitus (DM) is a major risk factor for coronary artery disease (CAD), which remains the leading cause of death in the DM population. Mechanistic research and noninvasive diagnostic tools have shed light on novel key players implicated in CAD development, and intracoronary imaging and functional studies provided insights on the coronary atherosclerotic plaque phenotype and coronary microvascular function in the diabetic population. New evidence has delineated an intricate biological link between DM and CAD, suggesting that there is a large heterogeneity in the risk of CAD, and distinct putative diabetic phenotypes, which differ for clinical, angiographic and prognostic features, have been hypothesized. This Special Issue aims to address the current advancements in the association between DM and CAD, from pathophysiology to diagnosis and therapy, focusing on the role of novel emerging technologies in highlighting DM heterogeneity, guiding the management of patients and potentially paving the way towards a future personalized therapy of this population. This Special Issue welcomes both original research papers and review articles.

### Guest Editors

Prof. Dr. Giampaolo Niccoli

Department of Cardiology, Parma University Hospital, Parma, Italy

Dr. Filippo Luca Gurgoglione

Department of Cardiology, Parma University Hospital, 43126 Parma, Italy

### Deadline for manuscript submissions

closed (24 April 2024)

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona  
Institute of Science and Technology, 08028 Barcelona, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
