

Special Issue

Novel Intervention Technology for Arresting Pathogen Transmission

Message from the Guest Editor

In this Special Issue, we would like to highlight the cutting-edge research currently being carried out at the forefront of the battle against these pathogens. We invite high-quality research studies detailing the development of effective antimicrobial intervention technologies against surface and aerosol transmission. The scope of this issue consists of the following:

- Ultraviolet and light-based technologies;
- Nanotechnology-based intervention methods;
- High pressure and thermal methods;
- Electrical discharge-based and microwave devices.

We look forward to featuring your exciting research in this field, which would be of great interest to the readers of the journal and the broad scientific community in general. Thank you.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
