

Special Issue

Skin Homeostasis: Mechanisms, Communication Routes, and Imbalances

Message from the Guest Editors

The human skin currently plays a remarkable role in biomedical research. Generally accepted as a “window” to look further into multiple processes, it has also become a preferential screen to assess various functional indicators, in the very center of this new self-e-health assessment age. Contemporary visions and contributions from physiology, molecular immunology, computational engineering, and electronics, among others, have transformed skin research into a uniquely transversal, multicollaborative hub that continues to develop and attract scientists from many different domains all over the world.

The present Special Issue, titled “Skin Homeostasis: Mechanisms, Communication Routes, and Imbalances,” edited by Life and led by Professor Monteiro Rodrigues and , aims to bring together different views from different backgrounds, from novel approaches to classic variables to new viewpoints and determinants beyond age, sex and race. We wish to gather leading related research that will impact many different applicational domains.

Guest Editors

Prof. Dr. Luis Monteiro Rodrigues

Universidade Lusófona – CBIOS Research Center for Biosciences and Health Technologies, 1749-024 Lisboa, Portugal

Dr. Bernard Querleux

L'Oréal Research and Innovation, Aulnay-sous-Bois, France

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
