

Special Issue

Abundance and Dynamics of Small Mammals and Their Predators

Message from the Guest Editors

This Special Issue invites research papers on small-mammal breeding, abundance and dynamics based on time series recorded in either natural or human-altered landscapes at different spatial scales. Dynamics of predator–prey systems, from the point of view of small mammals playing the role of predators and/or prey, are especially welcome. Our scope also includes predator–small-mammal interactions and predators’ responses both numerically and functionally to population dynamics of small-mammal prey, as well as the role of small mammals as regulators of invertebrate pests. Manuscripts analyzing the influence of environmental change (processes of forest fragmentation, land abandonment, wildfires, successional stages, climate change, etc.) as well as the biotic/abiotic properties and functions of landscapes on population/meta-population dynamics (changes in species abundance, demography, community composition, etc.) with either theoretical or empirical perspectives are welcome. https://www.mdpi.com/journal/life/special_issues/Small_Mammals_Predators

Guest Editors

Dr. Ignasi Torre

Natural Sciences Museum of Granollers, 08402 Granollers, Spain

Dr. Linas Balčiauskas

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
