Special Issue

Space Flight Factors and Cytoskeleton Organization

Message from the Guest Editor

The exploration of deep space inevitably confronts the need to develop countermeasures. Among the factors in space flight, especially beyond the Earth's magnetosphere, weightlessness, ionizing radiation, and the hypomagnetic effect are usually distinguished. This Special Issue is devoted to the influence of these factors on the structure and function of various types of cells. The focus of attention has turned out to be the cytoskeleton, as the most widespread cellular structure that connects various parts of the cell, participating in the regulation of the functioning of each of them. There are significantly fewer similar studies on the role of hypomagnetic and/or altered electromagnetic background on the structure and function of the cell and, in particular, the cytoskeleton. Thus, in this Special Issue, it is proposed to integrate the results of studies of the influence of various factors of space flight on the structure of the cytoskeleton and cell functioning. We invite research articles and reviews on this topic.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
