Therapeutic Effects of Natural Products on Human Diseases: 2nd Edition

Message from the Guest Editor

Natural products are compounds or substances produced by living organisms that are found in nature. Since natural sources are considered potential resources for developing lead compounds in drug discovery, a significant number of studies have focused on finding new therapeutic effects of natural products on human diseases, such as cancer, neurodegenerative diseases, immunological disorders, and metabolic diseases. This Special Issue, entitled “Therapeutic Effects of Natural Products on Human Diseases”, welcomes submissions of either research manuscripts or scientific reviews covering the therapeutic effects of various natural products (plants, microorganisms, algae, foods, animals, etc.) on human diseases. Importantly, mechanistic studies evaluated by in vitro and/or in vivo experiments to identify major molecules and/or cellular pathways of targeted therapeutic action of natural compounds should be involved.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
