Special Issue

Advances in Endoscopy for Hepatic, Pancreatic, and Biliary Diseases

Message from the Guest Editor

Recently, much progress has been made in the endoscopic management of hepatic, pancreatic, and biliary (HPB) diseases. Endohepatology, or interventional hepatology, is an evolving subspecialty; hepatic venous portal pressure gradient measurements are increasingly being used, and early data suggest that endoscopic sleeve gastrectomy may improve metabolic dysfunction-associated fatty liver disease. Lumenapposing metal stents have also grown in popularity in the treatment of pancreatic and biliary disorders. In this Special Issue, we invite original research articles, review articles or others showcasing the basic or clinical sciences associated with endoscopy in HPB disorders.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
