

Special Issue

Urinary Bladder Neoplasms

Message from the Guest Editors

Bladder cancer is one of the most common malignancies. Each year, more than 300,000 patients are diagnosed with this cancer worldwide. The incidence is higher in the male population, and in many countries bladder cancer is one of the top five most common malignant neoplasms in men. Furthermore, bladder cancer is a deadly disease, causing more than 160,000 deaths worldwide each year. Globally, the cancer age-standardized mortality rate (per 100,000 person/years) is 3.3 for men vs. 0.86 for women. In this Special Issue of *Life*, we present a series of high-quality original articles and meta-analyses concerning bladder cancer, illustrating the current developments in both diagnosis and treatment.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
