

## Special Issue

# Diagnosis, Treatment and Prognosis of Head and Neck Disorders

### Message from the Guest Editor

Disorders of the head and neck region represent a highly diverse and clinically complex group of diseases, encompassing inflammatory conditions, benign and malignant tumors, functional disorders, and traumatic or iatrogenic injuries. The head and neck region plays essential roles in respiration, phonation, mastication, swallowing, olfaction, and aesthetics; thus, diseases affecting this anatomical area may have profound impacts on patients' quality of life, psychological well-being, and long-term prognosis. This Special Issue aims to provide an up-to-date overview of research on the diagnosis, treatment, and prognosis of head and neck disorders by integrating clinical, translational, and technological perspectives. We welcome original research articles, reviews, and case-based studies that explore innovative diagnostic tools, emerging therapeutic modalities, prognostic biomarkers, rehabilitation strategies, and long-term outcome analyses.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
