

## Special Issue

# Common Complications of Pregnancy

### Message from the Guest Editors

An important strategy for preventing maternal and neonatal mortality is the early identification of pregnant women with a higher risk for complications during pregnancy. The prevention, therapeutic interventions, and diagnosis of pregnancy and birth complications are ongoing priorities for researchers and practitioners in this field. This Special Issue aims to provide a collection of manuscripts that present an overview of the latest research on complications of pregnancy and childbirth, including but not limited to gestational diabetes, pre-eclampsia, preterm labor, placenta previa, fetal growth restriction, and intrauterine infection. We desire to additionally explore the short- and long-term consequences of complicated pregnancies regarding maternal and neonatal morbidity and mortality. Topics will include, but are not limited to, the following:

- Epidemiology of pregnancy-related complications and maternal or neonatal mortality/morbidity;
- Short- and long-term consequences of pregnancy-related complications;
- Diagnosis and prognosis of pregnancy-related complications;
- New approaches of managing pregnancy complications.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
