

## Special Issue

# Brain–Heart Axis: Molecular and Cellular Biology of Cardiovascular Disorders and Mental Health

### Message from the Guest Editors

Cellular, molecular, metabolic, and genetic aspects in cardiovascular disorders are intimately interconnected and open new pathophysiological, diagnostic, and therapeutic perspectives. The link between mind and heart is characterized by a continuous and bidirectional exchange: a two-way communication on which the heart–brain axis is based. These are interconnected and interdependent entities, evident from the fact that pathological factors and conditions that affect one of these components can also affect the other. The aim of this Special Issue is to stimulate knowledge of the cellular and molecular mechanisms through which psychological factors, brain suffering and/or damage, epigenetic alterations, and gene mutations are associated with cardiovascular risk factors, predisposing patients to cardiovascular events. Furthermore, this multidisciplinary orientation could allow for more effective management of the clinical course of cardiovascular disease through a personalized therapeutic approach with a consequent reduction in terms of national health cost.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona  
Institute of Science and Technology, 08028 Barcelona, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
