Screening, Diagnosis and Treatment of Thyroid Diseases

Message from the Guest Editors

Nuclear medicine and thyroid diseases are intimately related. Indeed, the existence of nuclear medicine as a medical specialty began with the treatment of thyroid disease using Iodine-131 in the 1940s, which could be considered the first example of theragnostics. One would expect, after so many years of experience, all the questions regarding the diagnosis and therapy of thyroid diseases to have been answered. However, this is not the case. There remains significant controversy regarding the screening, diagnosis, and therapy of thyroid diseases. This Special Issue will focus on these controversies and new developments. The Special Issue welcomes contributions that address the evaluation and treatment of thyroid diseases, both benign and cancerous. Due to the complex nature of thyroid pathology, special expertise is required in clinical practice for the continuous development of the relevant techniques and technology. Therefore, this Special Issue aims to gather recent studies investigating the screening, diagnosis, and therapy of thyroid diseases. Any original research or narrative and systematic reviews covering the abovementioned topics will be considered.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
