

Special Issue

Skin Cancer: From Molecular Basis to Therapy: 2nd Edition

Message from the Guest Editor

The second volume of this Special Issue follows on from the success of the first one. With that said, we invite you to publish your research in this edition of “Skin Cancer: From Molecular Basis to Therapy”

(https://www.mdpi.com/journal/life/special_issues/3GW9E18Z8).

Keratinocyte tumors, commonly referred to as nonmelanoma skin cancer (NMSC), constitute a heavy burden of disease, being the leading malignancy in terms of frequency for Caucasian individuals. Specifically, in subjects with lighter skin phototypes, basal cell carcinoma (BCC) is the most common cancer. On the other hand, melanoma is a global health concern, being among the most common malignancies responsible for years of life lost in young adults. Additionally, rarer types of cancer arise in the skin: cutaneous lymphomas are a group of malignant lymphocyte proliferations that feature striking skin homing even during dissemination, which sets them apart from nodal forms of lymphoma.

This Special Issue is now open for the submission of new research papers and reviews. Prospective contributors are encouraged to share a brief abstract or provisional title with the Editorial Office to discuss with the editors.

Guest Editor

Dr. Alvise Sernicola

Dermatology Unit, Department of Medicine (DIMED), University of Padua, Padua, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
