

## Special Issue

# Clinical and Radiological Perspectives in Rhinosinusal Pathology

### Message from the Guest Editors

Sinus pathology is a primary clinical issue in otorhinolaryngology. Symptoms include nasal obstruction, rhinorrhea, facial pressure, hyposmia, and sinus pain.

This Special Issue aims to explore rhinosinusitis etiologies—viral, bacterial, fungal—and anatomical factors like abnormal sinus pneumatization. It will also examine links between sinus pathology and systemic conditions such as headache, migraine, and depression. We seek studies combining clinical expertise with advanced imaging for multidimensional insights.

We welcome original research, reviews, and meta-analyses to advance understanding and therapy for rhinosinusitis. Submissions on innovative treatments, surgical techniques, and evidence-based protocols are encouraged.

**Keywords:** chronic rhinosinusitis, CBCT, CT, acute rhinosinusitis, maxillary rhinosinusitis, ethmoidal air cells variants, maxillary sinus, Haller cells, Onodi cells, concha bullosa, agger nasi cells.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
