

## Special Issue

# Beyond Atherosclerosis: Between Unresolved Questions, Ongoing Studies, and Future Perspectives

### Message from the Guest Editors

Biomedical science has shown that atherosclerosis represents the protagonist of cardiovascular events. Even if many researchers have focused their attention on physiopathological mechanisms that drive atherosclerosis, many aspects are still unknown. At the same time, physicians now have different therapeutic options compared to the past. This Special Issue has the aim to deepen the unresolved aspects regarding atherosclerosis and create a focus on current and new therapeutic strategies and physiopathological mechanisms, helping researchers and physicians worldwide to inspire new studies and treat their patients in the best possible way.

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.
