Non-motor Functional Disability after Stroke

Message from the Guest Editor

The acute management of stroke has dramatically improved over the past few years, thus contributing to a reduction in case fatality. However, stroke remains a leading cause of handicap worldwide. Clinicians are confronted with stroke survivors who may present with a variety of disabilities, including fatigue, anxiety, depression, behavioral changes, or cognitive impairment, even when their global outcome was regarded as favorable. Although less visible than motor sequelae, these symptoms have a negative impact on patients' quality of life. A better understanding of the epidemiology, contributing factors, and underlying mechanisms of these symptoms is needed so as to develop innovative dedicated preventive and therapeutic strategies. This Special Issue aims to cover these different aspects of non-motor post-stroke disability. We invite researchers to contribute original and review articles based on observational or interventional clinical studies as well as experimental works, to enhance our understanding of non-motor functional disability after stroke.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
