Special Issue

Tumor-Host Interaction during Cancer Progression

Message from the Guest Editors

The tumor-host interaction in a dynamic tumor microenvironment (TME) modulates therapeutic efficacy and is now the most complex challenge faced in the development of an effective cure for cancer. Although remarkable advances in cancer treatment have been made in recent years, the precise molecular interplay underlying localized cancer subpopulations and tumorinfiltrated host cells is not fully understood. A deeper understanding of TME features is required for developing feasible platforms to detect tumor-host interaction as part of therapeutic schemes, which will lead to a more effective therapeutic strategy to overcome cancer resistance. This Special Issue will summarize the latest translational research, including research articles and comprehensive review articles on molecular and cellular mechanisms involved in tumorhost interaction. Submissions can be focused on tissue samples, animal models or cell experiments. Descriptions of single-cell sequencing, multiplex imaging or other molecular techniques that can be used to help define the tumor-host interaction are of interest. Articles can discuss both leukemia as well as solid tumors.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
