Apoptosis and Autophagy

Message from the Guest Editor

Apoptosis and autophagy represent two fundamental cellular processes. They are involved in cell fate decision and they crosstalk each other through the involvement of different key players. Nonetheless, the ability of apoptosis to cause cell death is counterbalanced by its ability to inhibit the cell death mediated by autophagy. Autophagy can also inhibit apoptosis and cause cell death. The intimate crosstalk between apoptosis and autophagy is not definitely dissected yet. It can occur during embryogenesis, tissue development, cell maturation and senescence. Alterations of such intriguing mechanisms can occur during tumorigenesis and other pathologies in mammals. Further evidence is urgently needed to clarify these fine-tuned cellular processes.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
