

Special Issue

Biologically-Relevant Materials

Message from the Guest Editors

The bioinspired development of materials for a myriad of applications has converged researchers from diverse disciplinary backgrounds in the life sciences, chemistry, physics and engineering fields. Fundamental understanding of how biological materials or bioinspired materials interface with biological structure and function is essential for the design of biocompatible materials, biocatalysis, and biomimetic materials. The development of biologically relevant materials is imperative to give rise to the next generation of bioinspired engineering. In this Special Issue we invite original research articles, reviews, and case reports in any context that intersects the fields of biological and materials chemistry for the creation of biologically-relevant materials.

Guest Editors

Dr. Kari Stone

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
