COVID-19: Epidemiology, Pathogenesis, and Vaccine

Message from the Guest Editor

Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) rapidly spread worldwide, and coronavirus disease-19 (COVID-19) has led to an estimated 6 million deaths worldwide since January 2020. Since its genetic sequence became available, the development and testing of vaccines directed against SARS-CoV-2 has grown at an unprecedented pace. The distribution of vaccines, together with nonpharmacological interventions, has been proven to be the only possible strategy to control the pandemic. As COVID-19 becomes under control and draws to a close, we encourage scholars from all fields to publish research articles on COVID-19 to provide scientific references for future studies.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
