Frontiers of Dermatological Research

Message from the Guest Editors

Autoimmune and autoinflammatory skin diseases are currently the subject of significant research in laboratory and clinical settings with new developments presented by scientists every single day. Despite incredible advances in our understanding of autoimmunity and inflammation, many questions remain unanswered. In this Special Issue, entitled “Frontiers of Dermatological Research”, we would like to present a collection of articles on the pathogenesis, epidemiology, clinical observations, and treatment of inflammation under different dermatological conditions. We invite submissions on genetic backgrounds, the role of the inflammasome, biological treatments and their complications, clinical investigations, and treatments using inflammation as their mechanism of action. This Special Issue will present different aspects of this fascinating process, from the basic science to the clinic, to provide readers with an overview of the state of the art in this topic.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
