

## Special Issue

# Fasciae from a Molecular and Biomechanical Perspective

### Message from the Guest Editor

Recently, we demonstrated that fasciae have specific receptors for endocannabinoids, for estrogen- $\alpha$  and relaxin-1, and that under such stimuli they alter the production of collagen types and hyaluronan. It is also known that diabetes can create a glycation of the collagen fibers in the plantar fascia and, as a result, alter the mechanical properties of the fascia. Besides, fasciae could be barriers to the spread of cancer, and their molecular/biochemical alterations could potentially affect the ability of a cancer to metastasize.

For this Special Issue, we aim to integrate studies on the following areas:

- Microscopic analysis of the various types of collagen and elastic fibers in fasciae (various types of fasciae and various situations (healthy or pathological));
- Studies about hyaluronan, which is one of the major components of the loose connective tissue inside fasciae;
- Effect of aging or training into fasciae;
- studies about the fascial innervation and how fascial inputs can effects brain dynamics
- studies that analyse the effect of the various physical and manual therapies into fascial tissue

### Guest Editor

Prof. Dr. Carla Stecco

Department of Neuroscience, Institute of Anatomy, University of Padova, Via Gabelli 65, 35127 Padova, Italy

### Deadline for manuscript submissions

closed (31 May 2022)

## About the Journal

### Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

### Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona  
Institute of Science and Technology, 08028 Barcelona, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
