

Special Issue

Advances in Heart Disease

Message from the Guest Editor

It is our pleasure to invite you to submit an article to this Special Issue on heart diseases, which will incorporate manuscripts on the multiple diseases that affect the cardiovascular system—a topic of great significance for life on Earth and the evolution of the species. The present Special Issue, edited by , will focus mainly on heart diseases which follow a heritage pattern, such as familial cardiomyopathies and channelopathies. Heart diseases are often incapacitating and some of the most frequent causes of death and co-morbidities. The recent proliferation of genetic studies on heart diseases' emergence and dissemination and the cost-benefit tradeoff have allowed a better understanding of these diseases, especially since the development of next-generation sequencing techniques, turning this issue into a hot topic in the field of life science.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
