Advances in Immunology of Infectious Diseases

Message from the Guest Editors

The study of host-pathogen interaction can provide new insights in the understanding of the immune pathogenesis of infectious diseases and immune evasion mechanisms. Studies addressing the issue of immunology of infectious diseases could fill the existing gaps in several aspects of the diagnosis, prognosis and therapeutic approaches of infectious diseases.

Host immune biomarkers able to distinguish infection from colonization would provide useful information to answer to the question whether to treat, give a prophylaxis or just observe patients with the identification of a specific pathogen in a body district.

The Special Issues is now open for submissions. Original research manuscripts or review articles related to various aspects of the immunology of infectious diseases with a translational significance are invited for this Special Issue.

Guest Editors

Dr. Marco Iannetta

Dr. Maria Antonella Zingaropoli

Dr. Vincenzo Malagnino

Dr. Serena Vita

Deadline for manuscript submissions

closed (26 November 2021)

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
