Medicinal Plants in the Strategies for Prevention and Treatment of Multidrug Resistance Microbe and Chronic Diseases

Message from the Guest Editors

Medicinal plants remain a predominant health treatment in many cultures, with more than 80% of the population in developing countries wholly depending on medicinal plants for medical purposes. Many diseases can be effectively cured by different plant parts (leaf, bark, and root). Moreover, medicinal plants can be used to prevent and/or revert abnormalities. Recently, plants have been extensively used in the form of drugs and dietary supplements. Many researchers in pharmacology, microbiology, botany, and phytochemistry have directed their efforts towards discovering novel bioactive compounds with potential to treat various diseases.

Guest Editors

Prof. Dr. Samy Selim

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
