Current Approaches in Molecular Enzymology

Message from the Guest Editor

As our technological repertoire advances, we are capable of digging deeper and deeper into the atomic level structures and mechanisms to dissect molecular pathogenesises. Beyond intellectual interest, the revealed pieces of information are also very relevant in the development of novel and increasingly specific clinical intervention strategies. The applied state-of-the-art biochemical, biophysical, structural, bioinformatic and molecular biology approaches resuscitated and revolutionized molecular enzymology research. All these novel tools in research, together with the completion of the Human Genome Project, also help reinvent thought to be known molecular targets. Several enzymes prove now to display moonlighting functions, whose modulation are reported to lead to auxiliary pathogenesises in disease. Targeting even a single element in a complex pathomechanism might already ameliorate clinical symptoms and improve survival rate. The motivation behind this Special Issue is to present *via* examples various up-to-date biomolecular techniques and scientific approaches that accelerate the elucidation of intricate molecular details in the course of enzymology research today.

Guest Editor

Dr. Attila Ambrus

Department of Biochemistry and Molecular Biology, Semmelweis University, 1094 Budapest, Hungary

Deadline for manuscript submissions

closed (20 October 2021)

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
