# **Special Issue**

# **Rare Neurological Diseases**

## Message from the Guest Editors

In Europe, a rare disease is one that affects fewer than 5 people per 10,000 in the population. This low prevalence results in a relatively low interest in investing in research into these diseases and the development of therapies. Nevertheless, they exist. More than 7000 rare diseases are supposed to exist, and a relevant group are neurological disorders: inherited retinal dystrophies, epilepsies, ataxias, choreas, dystonias, etc. Most of them are Mendelian disorders, affect children, are congenital, and may cause severe disability. They are often chronic and life-threatening. To make things worse, most of them lack an effective treatment. In this Special Issue, we invite you to submit original articles, reviews, or case reports focused on how neurodegeneration is commonly involved in the pathomechanisms of many rare diseases, and the most recent advances that may enable patients to receive an accurate diagnosis and achieve a rational treatment.

## **About the Journal**

## Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

#### **Editor-in-Chief**

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

#### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

#### **Journal Rank:**

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
