Reproductive Health Concerns for Women

Message from the Guest Editor

The preservation of reproductive function is of paramount importance for these women, contributing to a significant and big challenge in modern medicine. A better understanding of the pathophysiology of these disorders, and a continuous development of far-advanced new technology in the screening, monitoring, and managing of these disorders not only provide a better chance in the successful treatment for these disorders, but also for maintaining the anatomical and functional integrity in women. For example, with the aid of minimally invasive surgery and the combination of more effective medications in uterine fibroids, women can be managed conservatively with functional organ preservation in place of hysterectomy. In addition, assisted reproductive technology significantly helps many infertile couples to have their families. In this Special Issue on Reproductive Health Concerns for Women, I would like to invite all experts to contribute to the field. Extensive systematic reviews, and meta-analyses, as well as original research ranging from the bench to clinical management are all welcome. Let us work together to do something positive for our world.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
