Space Radiobiology

Message from the Guest Editors

From the beginning of mankind, humans have always wondered about the outer space above and its conquer. In the last 50 years, space biology has enriched the basic knowledge about the effects of space-radiation exposure and gravity unloading. However, the majority of studies are aimed at the protection of astronauts flying in the low earth orbit (LEO), and they are based on a yet few numbers of data collected from real space flight conditions or simulated ones. Future studies should not only be aimed at the prevention of health problems in space, but also at the management and resolution of pathological issues that may occur in an altered gravitational environment. To note that, health risks both comprise the ones deriving from a long-term radiation and microgravity exposure (cancer, immunological and neurological impairments, infections, muscle and bone loss, etc), together with the ones associated to isolation and confinement conditions (psychological problems). On the other side, outputs coming from space biology research may be useful to ameliorate human life on earth.

Guest Editors

Dr. Giorgio Russo

Dr. Walter Tinganelli

Dr. Marco Calvaruso

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
