

Special Issue

Telocytes and Other Interstitial Cells: From Structure to Function

Message from the Guest Editor

This Special Issue is devoted to recent progress in research onto interstitial cells in general. It also aims to form an opinion on the controversial role of telocytes and especially to see them integrated in the context of the concept of interstitial cells. Outstanding experts interested in this thematic issue are very welcome to send original manuscripts and reviews dealing with any of the abovementioned cells.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.
