

Special Issue

Therapeutic Prevention and Early Detection of Melanoma

Message from the Guest Editors

This Special Issue, edited by Dr. Clara Curiel and Dr. Georg Wondrak, will focus on therapeutic prevention and early detection of melanoma. While treatment modalities for melanoma have advanced in recent years, efforts to detect and prevent melanoma in the at-risk population have lagged. The present issue will highlight the breadth of ongoing research examining new biomarkers for detection, topical preventive agents, and other early detection methods that along with the novel melanoma treatments will lessen the burden of this skin cancer.
