Special Issue

Logic, Language, and Information

Message from the Guest Editors

We are pleased to invite authors of contributions presented at the ESSLLI 2023 and 2024 Student Sessions to contribute to a Special Issue of MDPI's journal *Logics* dedicated to the traditional tracks of ESSLLI: Language and Computation, Language and Logic, and Logic and Computation. Since 1996, the Student Sessions of the European Summer School in Logic, Language, and Information (ESSLLI) have provided ESSLLI students with an opportunity to submit their work, receive valuable feedback from experts, and present accepted papers to a diverse audience. We are happy to continue the tradition of arranging a journal Special Issue in which accepted contributors to the Student Session are invited to submit their work on the topics presented in the Student Session. The purpose of this Special Issue is to give the students who presented their work and received feedback at the Student Session the opportunity to incorporate further developments and improvements on that work and to make their interesting papers available through publication. Therefore, in this Special Issue, original research articles extending on the works presented at ESSLLIs are welcome to be submitted.

Guest Editors

Prof. Dr. Wesley H. Holliday

Dr. John Lindqvist
