Dr. Snežana Tadić
Logistics Department, Faculty of Transport and Traffic Engineering, University of Belgrade, Belgrade 11000, Serbia

Deadline for manuscript submissions:
30 November 2024

Message from the Guest Editors

The aim of this SI is to define innovative solutions in the field of MCDM and outline their application in achieving sustainable smart logistics solutions. If successful, we will contribute to literature and practice by defining new MCDM methodologies and models for solving real-life problems of contemporary logistics. Although articles should deal primarily with expanding the body of literature, primarily in the area of logistics, submissions are also welcome in the areas of OR, MCDM, Industry 4.0, or any of the following topics:

- Application of existing and development of new MCDM methods for solving various problems in sustainable smart logistics.
- Development of hybrid MCDM models in the conventional environment or the environment of intuitionistic and interval sets, for solving various problems in sustainable smart logistics.
- Development of optimization models for various problems in sustainable smart logistics.
- Application of heuristics and metaheuristics for solving various problems in sustainable smart logistics.
- Integration of sustainability criteria into MCDM models for smart logistics.

Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.
Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.7 days after submission; acceptance to publication is undertaken in 8.7 days (median values for papers published in this journal in the first half of 2024).
