

Special Issue

Supply Chain Management for Reducing Food Waste

Message from the Guest Editors

Food waste refers to produce discarded by end-consumers, unlike food loss, which occurs during production, post-harvest, and processing. End-consumers include not only households but also small restaurateurs and fast-food retailers. This Special Issue seeks to explore innovative strategies, technologies, and practices to significantly reduce food waste across the supply chain, positively impacting consumers, communities, and society. We invite high-quality research papers, case studies showcasing successful initiatives, and review articles that provide insights into the challenges and solutions for minimizing food waste and loss from production to consumption.

About the Journal

Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

Editor-in-Chief

Prof. Dr. Robert Handfield

Department of Business Management, Poole College of Management,
North Carolina State University, Raleigh, NC 27695, USA
