

## Special Issue

# Decarbonization of Maritime Logistics and Global Supply Chains

### Message from the Guest Editors

The Special Issue of the journal is aimed at providing an outlet for high-quality papers investigating the interplay between technology, operations, economics, environmental performance, and governance in the global challenge of decarbonisation and the net-zero target for maritime logistics and global supply chains. We welcome theoretical, empirical, computational, and policy-oriented papers that address the complex issue of decarbonising maritime logistics and supply chains. Topics include, but are not limited to: Decarbonisation Technologies and Fuels; Green Maritime Operations and Logistics; Policy, Regulation, and Market-Based Measures; Sustainable Supply Chain and Trade Implications; Digitalisation and Data-Driven Decarbonisation; Transition Economics and Investment Decisions. All submissions will undergo a rigorous double-blind peer review in accordance with the journal's quality standards. Both full research articles and short communications are welcome.

## About the Journal

### Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.
