

Special Issue

Current & Emerging Trends to Achieve Sustainable Supply Trends

Message from the Guest Editors

We are at a unique juncture in time of new and emerging policies, strategies, and technologies to advance the sustainability and transparency of global supply chains. A new generation of policies are rapidly being enacted, requiring companies throughout the value chain to increase the transparency and traceability of supply chains in regard to greenhouse gas reporting, human rights, forced labor, biodiversity, chemical safety, and critical minerals, as well as financial disclosures. In some cases, such as the European Union, there are requirements to be transparent and communicate the information through their “Digital Passport” regulations. This Special Issue will present new and emerging research on how multi-national organizations are implementing the strategies, systems, and investments within their supply chains and logistics to meet the rapidly emerging requirements of traceability and transparency. We seek to develop understandings of supply chain engagement practices, pre-competitive collaborations, development of the utility of AI and blockchain, and insights garnered from case examples.

About the Journal

Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.
