

Special Issue

Responsible Digitalization in Supply Chain Management

Message from the Guest Editor

All transformations and technological revolutions occurring after the 1950s have created great prosperity, progress, and value. However, several unintended consequences have simultaneously followed. Therefore, the current digital transformation could have similar effects if left unchecked. To date, the popularity of the phenomenon along with its current diffusion speed have not been followed by a comprehensive analysis of the real implications, especially in terms of corporate social responsibility (CSR). One important dilemma arises within this framework: Can digitalization be responsible? In this sense, De Giovanni (2020) has developed the concept of responsible digitalization, which consists in the capacity to engage in digital transformation without underperforming in terms of economic, environmental, and social performance (triple bottom line). This Special Issue of Logistics seeks to develop research, theory, and knowledge around the concept of responsible digitalization and evaluate its implementation in supply chain (SC) management with a particular emphasis on the emerging trade-offs.

About the Journal

Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

Editor-in-Chief

Prof. Dr. Robert Handfield
Department of Business Management, Poole College of Management,
North Carolina State University, Raleigh, NC 27695, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.
