

## Special Issue

# Application of Multi-Criteria Decision-Making Methods for Evaluation in Logistics and Supply Chain

### Message from the Guest Editors

Logistics and supply chains are very complex fields with a large number of conflicting elements. Therefore, the application of MCDM methods is required in order to achieve rationalization, efficiency, sustainability, and optimization. MCDM methods find applications in all aspects of logistics and the supply chain, such as city logistics, reverse logistics, green logistics, warehousing, industrial logistics, transport, intermodality, sustainable supply chain planning, sustainable distribution, industrial waste reduction, etc. The Special Issue aims to collect quality papers on the development or application of optimization models in the field of logistics and supply chains. With this Special Issue, we aspire to make significant contributions on advances in the MCDM literature from different operational and theoretical aspects. Submitted papers should not have been previously published or be currently under consideration for publication elsewhere. We invite authors to submit original research articles which propose novel MCDM optimization models for solving logistics and supply-chain-related problems.

## About the Journal

### Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.5 days after submission; acceptance to publication is undertaken in 5.6 days (median values for papers published in this journal in the second half of 2024).

#### Journal Rank:

JCR - Q2 (Operations Research and Management Science)  
/ CiteScore - Q1 (Management Information Systems)
