

Special Issue

Collaborative Logistics

Message from the Guest Editors

The growing call for more sustainability – socially, economically, and environmentally – has unveiled the limitations of our current logistical systems. Despite huge efforts to improve the efficiency of individual company operations, a large gap remains between the performance of the current system and the ambitious goals set by policy makers and corroboration by our society for the near and distant future.

The future vision of logistics is built upon the idea of collaboration, and relies on the integration of logistical operations beyond company boundaries. Through active synchronization of flows within a shared logistical network (often referred to as a ‘physical internet’), companies co-create synergies that could not have been seized by operating individually.

This Special Issue aims to contribute to the discussion on how collaborative logistics can catalyze the transition towards a new, more sustainable organization of our logistical systems.

About the Journal

Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

Editor-in-Chief

Prof. Dr. Robert Handfield
Department of Business Management, Poole College of Management,
North Carolina State University, Raleigh, NC 27695, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.
