

Special Issue

Supply Chain 4.0: New Generation of Supply Chain Management

Message from the Guest Editors

This Special Issue calls for accomplishments and contributions from academia and industry to address Supply Chain 4.0 issues and challenges. Original papers on, but not limited to, the following topics are welcome:

- Additive manufacturing supply chain management
- Autonomous warehouse systems
- Big data analytics
- Collaborative supply chain management
- Consumer behavior modeling and prediction
- Data-driven sales & operations planning (S&OP)
- Data-driven SCOR models
- Digital supply chain management
- End to end supply chain integration
- Intelligent demand forecasting
- Intelligent manufacturing systems
- Intelligent transportation systems
- Inventory track and trace
- Predictive maintenance systems
- Predictive inventory management and optimization
- Real-time supply chain synchronization and coordination
- Resilient supply chain management
- Smart products
- Smart factories
- Supplier selection intelligence
- Supply chain analytics
- Supply chain optimization
- Supply chain visibility and connectivity
- Sustainable supply chain management

About the Journal

Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

Editor-in-Chief

Prof. Dr. Robert Handfield

Department of Business Management, Poole College of Management,
North Carolina State University, Raleigh, NC 27695, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.6 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2025).

Journal Rank:

JCR - Q2 (Operations Research and Management Science)
/ CiteScore - Q1 (Information Systems and Management)
