

## Special Issue

# Supply Chain Resilience and Resilient Logistics Management

### Message from the Guest Editor

In recent years, supply chains (SCs) have been more susceptible to a variety of disruptions, including natural disasters, human-made attacks, and common failures, because of the complexity of their structures, globalization issues, and the frequency of disruptions. Hence, many businesses are increasingly recognizing the importance of designing resilient and reliable SCs, with a high capability of withstanding and recovering rapidly from disruptive events. As the disturbances could affect the normal operations of an SC, resulting in delivery delays, loss of market share and reputation, and poor customer satisfaction, a resilient supply chain is critical to the success of an enterprise. This Special Issue is open to various research methodologies, including qualitative (e.g., empirical studies) and quantitative (e.g., mathematical modeling, simulation, game theory, neural network, data mining, Bayesian network, machine learning, regression analysis, structural equations modeling, and data-driven analytics). The study can adopt any methodology that fits the research question. Some recent studies on SCR can be found in the bibliography of this call for papers.

## About the Journal

### Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

---

### Editor-in-Chief

Prof. Dr. Robert Handfield

Department of Business Management, Poole College of Management,  
North Carolina State University, Raleigh, NC 27695, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.6 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2025).

#### Journal Rank:

JCR - Q2 (Operations Research and Management Science)  
/ CiteScore - Q1 (Information Systems and Management)
