Emerging Challenges and Opportunities of Value Creation in Operations Management and Supply Chain Management: Best Papers from SIMPOI* and ENANPAD** 2022

Message from the Guest Editors

New trends in operations management and supply chain management are constantly arising. Considering that services and products are produced through a series of interrelated business activities, it is expected that the value of each activity in a process can be aggregated with the value of preceding activities. This Special issue aims to provide a space for discussing the emerging challenges and opportunities of creating value in operations management and supply chain management. Research areas may include (but not limited to) the following:

- Operations management and supply chain management from a circular economy perspective
- Digital transformation and sustainable management in organisations
- Project management: processes, people and technologies
- Sustainable operations management
- Agricultural and extractive supply chains
- Risk management and resilience in organisations and supply chains
- Service operations management
- Strategy and operations management

About the Journal

Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal Logistics, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.
