

Topical Collection

Lymphomas

Message from the Collection Editors

This Collection of the *Lymphatics* journal aims to enable the rapid publication of contributions concerning all aspects of lymphoma research, ranging from basic research to clinical applications. Topics include, but are not limited to, the following:

- Improving the assessment of prognosis in lymphomas using clinical and molecular markers;
- Improved understanding of environmental contributors to the development of lymphoma;
- Novel cellular therapies in lymphoma;
- Identification of appropriate patients and cell therapy products;
- Methods of limiting the toxicity of treatment;
- Understanding mechanisms of resistance to current therapies;
- Optimizing post-treatment surveillance strategies in patients with aggressive lymphomas.
