

## **Smart Manufacturing and Processes Optimization: Toward More Sustainable Production Systems**

Guest Editors:

**Dr. Francisco J. G. Silva**

**Dr. Raul D. S. G. Campilho**

**Dr. Arnaldo G. Pinto**

**Dr. Vitor Fernando Crespim  
Sousa**

**Prof. Dr. António Pereira**

Deadline for manuscript  
submissions:

**closed (30 September 2023)**

### **Message from the Guest Editors**

Manufacturing processes keep evolving. In fact, the need to process new materials, the incessant search for process automation and cost reduction, as well as the need to care for the environment and make processes more sustainable in economic, environmental, and social terms, implies constant research around an immense range of manufacturing processes. This Special Issue aims to reveal the most recent studies carried out in the manufacturing area with a view to optimizing processes in their most diverse aspects: automation and robotization, design of new equipment, study of the best processing parameters, systems capable of guaranteeing quality, capable of reducing the cycle time of certain operations, the integration of production systems, systems that improve the working conditions and health of operators, among many others. The Editors expect to receive contributions of the highest quality in terms of improving processes and working conditions, essentially with a view to increase sustainability.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Antonio J. Marques  
Cardoso**

## Message from the Editor-in-Chief

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1 (Control and Optimization)
