Deadline for manuscript  
submissions:

**30 April 2024**

### Message from the Guest Editors

Dear Colleagues,

The rapid growth of advanced technologies and their massive introduction into industrial contexts is radically changing the approach to design and manufacturing.

This Special Issue focuses on all aspects of scientific and technological progress related to advanced design approaches and manufacturing technologies. It welcomes original research articles aimed at exploring recent developments in relevant areas, applying interdisciplinary approaches. Review articles are also accepted for proposal.

Potential topics of this Special Issue include, but are not limited to, the following:

- Design for Additive Manufacturing;
- Advanced numerical simulation methods and techniques to support product and process analyses, design, and monitoring;
- Generative Design for AM;
- Remanufacturing;
- Design for Disassembly;
- Reverse Engineering;
- Digital Twin;
- Overall Equipment Effectiveness improvement;
- Smart maintenance and Structural Health Monitoring (SHM);
- Extended Reality;
- Artificial Intelligence and preventive maintenance for smart manufacturing.

## Message from the Editor-in-Chief

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Mechanical*)
