### **Message from the Guest Editors**

The aim of this Special Issue, entitled “Selected Papers from the ICIEAM 2021 Conference”, is to consider the current challenges faced by industrial engineering and present the most important and relevant advances in applications such as mechatronics, robotics, electrical engineering, measurements, control systems, and drives. The Special Issue will include modern research results and developments in industrial engineering, which will be of interest to a wide audience of academicians and professionals.

All submissions should extend at least 50% content compared to the conference paper.

The topics are not limited to:

- Mechatronics
- Automation
- Power systems
- Computer technologies for industrial application
- Electrical machines and drives
- Power electronics
- Measurements

## **Message from the Editor-in-Chief**

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within *Scopus*, *SCIE (Web of Science)*, *Inspec*, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1 (Control and Optimization)
