Message from the Guest Editor

Dear Colleagues,

To celebrate the 70th anniversary of the School of Mechanical Science and Engineering of Huazhong University of Science and Technology, we plan to launch this anniversary Special Issue on the latest status of intelligent design and manufacturing of electromechanical systems, aiming at intelligent design, and novel findings on the dynamics of electromechanical systems, vibration and noise control, fault diagnosis, intelligent manufacturing equipment/theories, and robotic technology.

Therefore, this Special Issue will commit to bringing together original papers, which reveal the state-of-the-art in the field of intelligent design and manufacturing and to promote the development of intelligent design, manufacturing, and control. Papers containing theoretical innovation and practical experimental results are particularly encouraged.

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *Inspec*, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1 (Control and Optimization)
