Message from the Guest Editor

Dear Colleagues,

High performance parallel robotic machine tools' development is a vital factor for advanced manufacturing industries. Improving the performance of the machine tools' manufacturing system will be a prevalent topic for researchers and engineers. This Special Issue aims to bring researchers together to present recent advances and technologies in the field of parallel robotic machine tools, and robotics and mechatronics for manufacturing and automation. Topics include, but are not limited to:

- New modelling and control methods for robotic machine tools
- Green manufacturing system development
- Kinematics and dynamics of new mechanisms
- Parallel robotic machine tools' design and development
- Sustainable manufacturing system
- Robotics

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
